

ENVIRONMENTAL REMEDIATION

Clients Benefit Because Eagle-SWS Provides:

- ◆ ***Customized Project Execution And Delivery***
- ◆ ***Operations Personnel With A Wide Range Of Experience***
- ◆ ***A Pragmatic Approach And Understanding For Resolving Industrial And Environmental Issues***
- ◆ ***Practical And Technically Sound Solutions***
- ◆ ***Client-Focused, Safety-Oriented, And Quality-Driven Strategies***

ENVIRONMENTAL REMEDIATION ▼

Eagle-SWS has extensive experience in performing construction and remedial excavation projects. We have performed thousands of excavation projects ranging in size from a few thousand dollars to several million. Remedial excavation projects have included a wide range of contaminants including petroleum hydrocarbons, organic compounds, caustics and acids, low-level radioactive compounds, heavy metals, medical wastes, and PCBs. We also perform clean excavation and earthmoving projects as part of ecological restoration efforts.

Eagle-SWS has used excavation as part of many remediation projects ranging from simple trenching for utility placement to complex trenching for drainage and cut-off purposes. Excavation has evolved significantly since the days of “hog and haul” to a point where highly sophisticated excavations are much more common and cost-effective. Eagle-SWS minimizes the quantity of material excavated by applying a variety of techniques including detailed planning, soil screening, segregation of materials, and efficient site layout.

Types of remediation projects conducted include:

- ◆ Excavation of lagoons and waste impoundments
- ◆ Excavation of buried wastes, cylinders and drums
- ◆ Waste stabilization and excavation
- ◆ Excavation of contaminated soils
- ◆ Waste excavation, consolidation, and landfilling
- ◆ Residential soil removal actions
- ◆ Spill response excavation and disposal of contaminated soils
- ◆ Stream sediment excavation and restoration
- ◆ Clean construction and earthmoving projects
- ◆ Surgical source removal

One of our distinct advantages in the execution of these projects is that we have an extensive inventory of our own equipment. Eagle-SWS owns and operates over \$25 million in remediation equipment. We also employ a group of experienced construction professionals that include superintendents, heavy equipment operators, field technicians, and laborers.
