

ENVIRONMENTAL RESTORATION

Clients Benefit Because Eagle-SWS Provides:

- ◆ **Customized Project Execution And Delivery**
- ◆ **Operations Personnel With A Wide Range Of Experience**
- ◆ **A Pragmatic Approach And Understanding For Resolving Industrial And Environmental Issues**
- ◆ **Practical And Technically Sound Solutions**
- ◆ **Client-Focused, Safety-Oriented, And Quality-Driven Strategies**

ENVIRONMENTAL RESTORATION ▼

Eagle-SWS provides a full range of environmental restoration services:

- ◆ Earthmoving and civil construction of canals, levees, and watershed systems
- ◆ Contaminated sediment removal and dredging
- ◆ Riverbed/lake bed, wetlands, beach, and shore restoration
- ◆ Erosion and flood control
- ◆ Water and watershed management
- ◆ Brownfields redevelopment
- ◆ MGP site restoration

Environmental restoration is one process of renewing native ecosystems to a close approximation of their condition prior to disturbance. The objective is to emulate a natural, self-regulating system that is integrated with the landscape in which it occurs.

Environmental programs nationwide have shifted focus from individual pollution incidents and industrial practices to non-point-source influences and development-driven impacts on our natural water resources. Our restoration techniques provide remedial and new-development features for a variety of water resources, including industrial and municipal wastewater effluent, stormwater runoff, groundwater aquifers, streams, lakes, wetland ecosystems, and coastal estuaries.

- ◆ Subsurface/groundwater and surface water/wetlands capabilities
- ◆ Wetlands mitigation and mitigation banking
- ◆ Stream-channel and basin restoration
- ◆ Wildlife habitat construction
- ◆ Constructed wetland cells for supplemental wastewater treatment
- ◆ Stormwater and erosion-control systems
- ◆ Coastal-zone restoration and tidal-estuary enhancements
- ◆ Waterfront-property development and restoration
- ◆ Sediment management, remediation, and restoration

Our goal is to consistently provide our clients with the highest level of technical competence, strong project management, integrated health & safety, and quality control with an emphasis on financial accountability for all projects.
