## ***TECHNICAL SERVICES*** ▼

Eagle-SWS's Technical Services Division provides expert environmental assessment and remediation services for a diversity of clients ranging from local property owners to major industrial and governmental agencies. Our network of professionals in service centers throughout the midwestern and southeastern United States provide local expertise and complete field service capabilities to reduce exposure to environmental liability and successfully resolve existing environmental issues.

Our comprehensive environmental capabilities range from ASTM Phase I Environmental Site Assessments to extensive subservice investigations, excavation and site remediation. More specifically, Eagle-SWS specializes in Phase I, II and III environmental site assessments (ESAs); comprehensive contamination assessments including, soil and groundwater sampling and analysis; groundwater modeling; remediation system design and implementation for both contaminated soil and groundwater; transportation and disposal of hazardous and non-hazardous wastes; facility audits for environmental compliance and/or health and safety issues; underground (UST) and aboveground (AST) storage tank removal and closure assessments; geoprobe drilling and mobile laboratory services; and landfill consulting services.

Eagle-SWS's diverse staff of professionals including geologists, hydrogeologists, chemists, biologists and environmental scientists look forward to working with you to successfully identify and resolve your environmental issues using the most cost effective and prudent approach. Our specific field of services includes:

- ◆ Excavation and source removal
- ◆ Soil mixing and stabilization
- ◆ In-situ treatment including, chemical oxidation, bioremediation, air sparging, & soil vapor extraction
- ◆ Environmental audits
- ◆ Phase I, II and III site assessments
- ◆ Contamination assessments
- ◆ Technical report preparation
- ◆ Health and safety plans
- ◆ Construction and closure of landfills
- ◆ Leachate collection systems, design and installation

Our goal is to consistently provide our clients with the highest level of technical competence, strong project management, integrated health & safety, and quality control with an emphasis on financial accountability for all projects.
