

TRAINING SERVICES

Eagle-SWS Training is our full-service Environmental, Health and Safety (EH&S) training team serving the needs of private industry and government for over fifteen years.

We provide services throughout the U.S. As with all of our services, training is delivered with a client focused, safety oriented, quality driven philosophy aimed at minimizing our clients EH&S risk exposure.

TRAINING ▼

Eagle-SWS owns and operates two Environmental Training Centers located in Ft. Worth, Texas and Birmingham, Alabama. With large training classrooms, state-of-the-art media, professional equipment, reliable communications, knowledgeable instructors, and on-site training exercises, Eagle-SWS has all the ingredients to provide quality training. The delivery of our professional training services is under the management of Certified Hazardous Materials Managers with over 50 years of field experience and training instruction.

If traveling to one of our Environmental Training Centers is not the best option for your employees, any of our courses can be delivered at your facility with a training program developed for your organization. We will help you assess what type of training your employees are required to have, develop a customized training program that focuses on their needs, and deliver the training at your location according to your schedule.
